Art Unit: 2141

1. Claims 1-2 and 4-13 are presented for examination.
2. Applicant's election without traverse of Group I, claims 1-2 and 4-13 in the reply filed on 03/21/2005 is acknowledged.
3. Applicant is requested to formally cancel non-elected claims 14-35.
4. Claims 1-2, and 4-13 are rejected under 35 U.S.C. § 103 (a) as being unpatentable over Chen et al. (Chen) patent no. 5,553,609, in view of Dean et al. (Dean) patent no. 5,943,478, and Hecht et al. (Hecht), patent no. 5,032,979, and Seeley et al. (Seeley), patent no. 6,097,429.
5. As to claim 1, Chen teaches the invention substantially as claimed, including a server (Master Monitoring Station (MMS) 24 figure 7; col. 6 lines 23-50) for making it possible for a remote client, the client being of a plurality of clients (health care professionals, col. 6 lines 23-50) to control an image sensing device via a communication medium and for controlling to transfer video information, which has been captured by the image sensing device, to the plurality of clients via the communication medium (col. 8 lines 15-40; col. 11 lines 38-52), said server comprising:

an input device, adapted to enter a request for transferring the video information captured by the image sensing device to the plurality of clients, and another request for control the image sensing device remotely (col. 8 lines 15-40; col. 11 lines 38-52; col. 18 lines 20-24).

Art Unit: 2141

However, Chen does not explicitly teach the request entered by a user different from the client for reporting information identifying the plurality of clients that received the video information, nor information identifying the remote client to said server gives a control privilege to control the optical system and orientation of the image sensing device remotely and exclusively.

Dean teaches an administrator who is different than an user can obtain report information identifying users that receive selected media services from a media server using user access data and user information tracking (col. 1 line 66 - col. 2 line 37, col. 7 lines 28-67).

Hecht teaches using audit commands by superuser and generating an audit record for each recorded event which includes actions taken by computer operators and system administrators (col. 5 lines 35-68; col. 18 lines 15-40).

Seeley teaches giving an operator sole responsibility of controlling a video security system remotely (col. 7 line 63 – col. 9 line 40)

It would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to combine the teachings of Chen, Dean, Hecht, and Seeley to allow a user other than the client to enter a request to identify and report the clients that received the video information, and another request for identifying the remote client that has the control privilege to control the optical system and orientation of the image sensing device remotely and exclusively because it would allow the system to provide accurate accounting service and audit trail.

6. As to claims 2 and 4, Chen teaches said image sensing means is a camera and

Art Unit: 2141

control of the image sensing means includes optical control and orientation control (col. 8 lines 15-40).

7. As to claims 5 and 7, Chen teaches input device includes: a voice input unit; and a recognition unit, adapted to recognize a voice input by said voice input unit; and notification device reports by voice (col. 4 lines 55-61; figures 3-4).

8. As to claim 6, Chen teaches information reported includes user names (col. 6 line 51 - col. 7 line 2).

9. Claims 8-13 have similar limitations as claims 1-2 and 4-7; therefore, they are rejected under the same rationale.

10. Applicant's arguments with respect to claims 1-2 and 4-13 have been considered but are deemed to be moot in view of the new grounds of rejection.

11. Applicant's amendment necessitated the new grounds of rejection. Accordingly, THIS ACTION IS MADE FINAL. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
